AR/VR APP DEMO FOR THE RHODE ISLAND LOTTERY

TheLot

We are pleased to introduce an exciting new mobile app which allows you to place a virtual RI Game Touch 28 (GT28) machine in the room, and lets you explore its features and learn how to operate and maintain it.

Compatible Mobile Devices

This app works with all mobile devices, including:

- **iPhone SE/6/7/8/8 iPhone Plus/X/11/XR & newer**
- **iPad, iPad Pro**
- **Galaxy S7/S8/S9 and newer; most Android devices**
- **Galaxy Tab**
- **Pixel 2/2XL and newer**

NOTE:
Each device manufacturer also has a minimum OS version required to run the Vuforia View app.

Requirements

- Mobile device with either iOS 13+ or Android 6+
- Vuforia View® App
- RI GT28 AR/VR App

Installing the Vuforia View® App
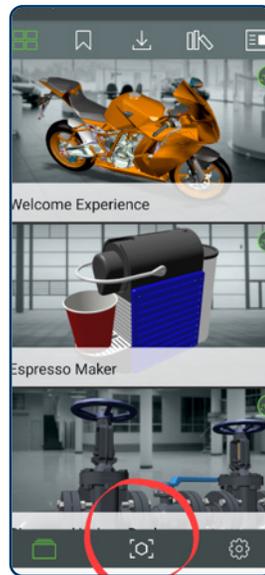

APPLE APP STORE:

GOOGLE PLAY STORE:

Installing the RI GT28 AR/VR App

- Download the free Vuforia View® app onto your mobile device using the QR codes on the left panel. Scan them with your device's camera.

  NOTE: **If your device camera does not recognize QR Codes, search your app store for "Vuforia View".**

- Once the app is downloaded, use *Vuforia View* to scan the RI GT28 QR Code below in order to launch the experience. The Vuforia View built-in scanner is found at the bottom of the app UI as shown here:

The experience will run automatically. After scanning this code, the experience should save onto your device's View app, so you won't have to scan this code again.

Using the RI GT28 AR/VR App

- When the experience loads, a welcome screen displays:

- Touch the **Menu Icon** at the top left and select from one of the 3 Augmented Reality views: *Getting Started*, *Daily Activities*, or *Quick Success Tips*.

VIEW #1:
GETTING STARTED

This view is meant to instruct you with the steps necessary to get the GT 28 up and selling tickets soon after it is delivered. Once this View is completed, you will know how to open the machine, disable the alarm by logging in to the Manager Menu display, and properly load tickets into the bins.

VIEW #2:
DAILY ACTIVITIES

This view provides you with a menu of choices, where you can pick interactive exercises based on several common maintenance routines.
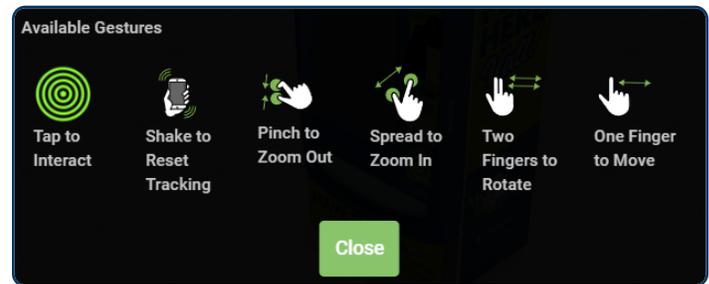

VIEW #3:
QUICK SUCCESS TIPS

This view allows you to place the virtual GT28 on the floor, and touch targets which provide information about all the parts of the machine, just like a Quick Reference Card, which are provided to lottery retailers.

Once a view is selected, move your device back and forth across a horizontal surface, and tap to drop the model into the virtual space.

NOTE: The model may take longer to load initially, on a desk or table. Try to scan an open area of the floor, because the model is life-size (1:1 with the real Game Touch 28). After it is visible, tap the screen to place the model, and then use touch gestures to manipulate the model's size and position.

Gestures and UI Elements

These are the touch gestures used to manipulate the virtual model. Touch the **Help icon (?)** at any time to display the following gestures.

Available Gestures

Tap to Interact	Shake to Reset Tracking	Pinch to Zoom Out	Spread to Zoom In	Two Fingers to Rotate	One Finger to Move

Close

Each View contains guided instructions which will help you navigate using an AR/VR experience, but in general **there are six (6) interactive icons to become familiar with:**

	Animated **Green Targets** indicate an area that can be touched with your finger.
?	Tap the **Question Mark** to display in-app help.
	Tap the **Reset Icon** to return the virtual GT28 model back to the original state, with all doors closed.
THE "QUICK SUCCESS TIPS" VIEW HAS 3 ADDITIONAL ICONS:	
	Tap this icon to open the main GT28 door and show interactive targets inside the GT28.
	Tap this icon to close the main GT28 door and return the targets to external components.
	Tap this icon to reactivate all targets.

USER SURVEY

PLEASE SCAN THIS QR CODE TO ACCESS A BRIEF USER SURVEY TO PROVIDE US WITH YOUR VALUABLE FEEDBACK.
